EDUCATION

University of Southern California

Master of Science in Computer Science

Los Angeles, CA

Aug. 2025 – May 2027

University of California, Santa Cruz

Bachelor of Science in Computer Science

Santa Cruz, CA

Sept. 2021 – May 2025

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, Kotlin, Swift

Frameworks: React, Node.js, Express.js, Flask, AngularJS, SwiftUI, Jetpack Compose

Cloud/DevOps: AWS, GCP, Docker, Kubernetes, GitHub Actions, SAML SSO

Databases/Infra: PostgreSQL, Firebase, InfluxDB, Prometheus, Elasticsearch, Kafka, Grafana

EXPERIENCE

Engineering Intern

Tokonoma AI

June 2026 – Present

Redwood City, CA

- Developed and optimized product MCP tools, reducing token usage by 30%.
- Integrated enterprise identity providers through SSO using Google SAML.
- Extended internal agent evaluation framework to benchmark tool performance, resource usage, and LLM output quality.
- Created GitHub Actions CI workflow to run integration tests against Starlette/Uvicorn services and PostgreSQL-backed components.

Software Engineering Intern

WideSense Inc.

Jun 2022 – Aug 2022, Jun 2023 – Aug 2023, Jun 2024 – Aug 2024

Berkeley, CA

- Returned for 3 internship terms, building both customer and administrative features on the frontend, backend, and database layers of the application.
- Built a full-stack IoT analytics dashboard using AngularJS, Flask, PostgreSQL, and InfluxDB, enabling customers to visualize device telemetry, filter historical trends, and inspect sensor-level performance.
- Developed various Flask APIs, integrating audit log for admin viewing and a notification system for customers.
- Wrote unit and integration tests with Jasmine, contributing to over 80% code coverage.
- Designed PostgreSQL schema changes and managed database migrations with Alembic.

Engineering Intern

Pluribus Networks

June 2020 – August 2020, Sept 2021 – May 2022

Santa Clara, CA

- Built a Python service to generate product performance tests for network switch fabrics.
- Published high-volume stress-test data through Kafka for switch fabric benchmarking.
- Analyzed metrics in Kibana and Grafana using Elasticsearch-backed dashboards.

PROJECTS

Sock Shop | *Python MCP, Docker, KIND*

- Built a Kubernetes-facing MCP server that exposes tools for inspecting pods, deployments, services, and cluster state.
- Deployed a multi-service Sock Shop application locally with Docker and KIND to simulate production-style debugging workflows.

Loot Me! | *VisionKit, SwiftUI, Gemini, Firebase*

- Implemented a custom OCR pipeline to detect and extract text from receipts, optimizing for cost-effective LLM usage
- Published a bill-splitting iMessage extension on the App Store with a Firebase backend.

Event Discovery | *Kotlin, Jetpack Compose, Gradle, Python, Express.js, GCP*

- Kotlin Android app that allows users to discover events worldwide.
- Utilizes public APIs, aggregates events from multiple sources for convenience

EXTRACURRICULAR ACTIVITIES

UCSC FSAE

Santa Cruz, CA

Drivetrain Team Lead

Aug 2024 – Jun 2025

- Led a team of 6 in designing and manufacturing the drivetrain for a Formula SAE vehicle
- CAD and FEA analysis of drivetrain components to ensure structural integrity and performance
